

**iDiscoveri XSEED to Conduct School Leaders Clinics across 35 cities across the country**

*XSEED makes a case for improved teaching and learning by using the 5 Step Experiential Learning Method*

**New Delhi, 28<sup>th</sup> November 2011** – Over 900 schools from across the country will converge in 35 cities across the country to attend School Leaders Clinics organized by iDiscoveri XSEED. This is possibly one of the largest such initiatives in the education sector.

XSEED School Leaders Clinic is a series of workshops for School Principals, Correspondents and Owners to help address the challenge of improving the quality of learning inside classrooms. Launching this series, Mr. Anustup Nayak, Partner at iDiscoveri Education said, “We are delighted to launch the XSEED School Leaders Clinics across 35 cities across the country. This is our most significant outreach effort to advocate the case for superior learning methods, teaching tools and continuous assessment, to impact quality in schooling. I extend a warm invite to Principals, Trustees and Correspondents of schools to engage actively in this conversation.”

Today the biggest challenge facing school is the quality of learning. Research in recent years by noted educationists has clearly established that children learn best by action which is followed by reflection and feedback. The 5 Step Experiential Learning method embeds this philosophy. This is different from the one-step telling or memorizing approach that tends to be followed inside a traditional classroom. For future-ready children, schools need to move away from the traditional or rote approach to new modes of engaging and working with children.

Planned as a comprehensive half-day engagement, each clinic will feature sessions on the 5 Step Experiential Learning Method, tools to implement the method and case study presentations by schools using this method. The iDiscoveri XSEED team has already connected with over 450 schools across 20 locations in the country over the past two months. Additional clinics are being conducted across the country, in 35 cities on the 10<sup>th</sup> and 17<sup>th</sup> December, 2011.
